- **Tech Tools:** git / serverless framework/jupyter notebook
- **Tools:** Slack, Asana, Nuclino, Excel, SCRUM...
- **Languages:** Spanish/English (C1)
- **Mindset:** Keep on learning!

ABOUT ME

Hey! My name is Antonio and I like to consider myself a learning enthusiast. It was after my first two jobs as a traditional engineer when I got my first contact with software development and I truly fell in love with it. This made me change the course of my career, getting my first tech related job at SuperTech, where I could learnt the basics of start-ups business models working as product manager. This experience, along with a very strong determination to become a software developer, allowed me to co-found Plant On Demand, the first online sales and management platform for the short food supply chain.

EXPERIENCE
