

# ANTONIO J PARODY GUZMÁN

## FULL STACK DEVELOPER

Hey! Nice to meet you. I'm Antonio and I like to consider myself a learning enthusiast. It was after my first two jobs as a traditional engineer when I got my first contact with software development and I truly fell in love with it. This experience, along with a very strong determination to become a software developer, allowed me to co-found Plant On Demand, the first online sales and management platform for the short food supply chain.
